Service Capabilities

Rough-In

Below-slab and in-wall plumbing before drywall.

- Underground DWV (drain, waste, vent) piping per engineered plans
- Water supply line rough-in — copper or PEX per specification
- Stub-outs for all fixtures per plan
- Pressure testing and leak verification
- Lee County permit pull and inspection coordination
- Photo documentation at each phase for builder records

Top-Out

Vent stacks and above-ceiling connections.

- Vent stack extensions through roof
- Above-ceiling DWV connections
- Water heater rough-in and gas line (if applicable)
- Hose bib and irrigation stub-outs
- Pre-drywall photo documentation for builder PM

Trim & Finish

Final fixture installation, testing, and turnover.

- Faucet, toilet, and shower valve installation
- Dishwasher, ice maker, and disposal connections
- Water heater final install and startup
- Full system pressure and flow testing
- Final inspection and Certificate of Completion

Commercial

Full-scope commercial plumbing with AIA pay applications.

- AIA G702/G703 schedule of values and monthly pay applications
- Multi-story DWV and supply risers
- Backflow preventer and RPZ installation
- Medical gas rough-in (healthcare projects)
- Grease trap and interceptor installation
- Coordination with mechanical, electrical, and fire protection trades
